CATERPILLAR®

Cruise Kits for Cat RV Engines

take the road

less traveled

No matter where your adventures may lead, you can take along a few items you need to keep your Caterpillar engine running strong. With the RV Cruise Kit, you get a fuel filter, oil filter and coolant additive as well as coolant test strips and gloves, all in a convenient carrying case that's ready when you are. Just like your jumper cables, you hope you don't need them, but you will be glad you have them.

If you need service you will also find a directory to the Cat RV Center network as well as valuable information about your Caterpillar engine. RV Cruise kits are filled with Genuine Caterpillar Advanced High Efficiency filters so if you need to change you can be sure to have the exact part you need.*

The case is made in the USA of high quality ABS plastic for excellent durability and fitted with a robust seal to keep out moisture, dirt and other contaminants. This ensures that your kit will be ready when you need it.

Parts, Service and Support

Getting replacement components for your kit is no problem. Just visit any Caterpillar Dealer and they can refill your kit quickly. If you're not sure where to find a dealer, the kit has the toll-free RV hotline number right on the outside.

Want to be sure you are getting the service your Caterpillar engine needs? Visit a Cat RV Center, with over 90 locations and more coming soon, it's likely we have one near you or on your route. RV Centers offer the specialized training and equipment required by many of today's popular Class A recreational vehicle brands.

* Most Freightliner Custom Chassis Corp. (FCCC) models require a different fuel filter. Engine serial numbers included begin with CKM or HEP.

CAT, CATERPILLAR, their respective logos, "Caterpillar Yellow" and the POWER EDGE trade dress, as well as corporate and product identity used herein, are trademarks of Caterpillar and may not be used without permission.

Keep an RV Cruise Kit on board and drive with confidence
